

## CLOSED/DROP/COMPLETION PROVISION IN WAMIS

Initially in Close work screen users were closing the work simply adding the closing date. But now as per new requirement provided by RD Dept., CDAC has restructured and enhanced the screen with new features as Close/Drop/Completion for various works in WAMIS.

Characteristics of various functionalities: -

### Closed Works

For those works whose agreement is present but Physical Completion Date is absent those work numbers get populated upon selecting **Closed** from the drop-down list.

### Drop Works

Those works in WAMIS whose agreement details are not present will get populated upon selecting **Drop** from the drop-down list.

### Completion Works

For those works whose agreement details have been present along with Physical Completion date but financial completion date is absent in WAMIS, such works will get populated upon selecting **Completion** from the drop-down List.

Feature Name	Agreement	Physical Completion
Closed Work	✓	✗
Drop Work	✗	✗
Completion Work	✓	✓

### **Notes:**

If a Parent work has multiple split IDs against it then in that case user needs to be aware of few things before Closing/Dropping the works or adding it to completion list.

- In Close work scenario the parent work along with its split IDs must have agreement details present against it. Physical Completion Date should not be present against it for both parent and split IDs. System won't allow to view the work if in case the work doesn't fulfil the condition stated above.
- In Drop Work scenario the parent work along with its split IDs shouldn't contain any agreement details or Physical Completion against it. If the condition is not followed then desired work IDs won't get viewed upon selecting drop from drop down list.
- Similarly in Completion scenario both parent and split must have agreement details and Physical Completion date present against it. If in case a split ID doesn't have agreement & physical completion and User is expecting it to save it into completion list then system won't view the work in the list of completion work.

## Close Work: -

In operator Login (WMS) user selects **Works Module** → **Execution** → **Close/Drop/Completion**.

Then user selects Demand No., Major Head and **Closed** from drop down filter header provided on the screen. On clicking Search button the list of work will get listed below who fulfils the conditions of closed work.

The screenshot shows the 'Close Work' interface. The left sidebar has 'Completed/Closed/Drop' selected. The search filters are: Demand No. 28, Major Head: --Select--, Minor Head: --Select--, Detail Head: --Select--, Work Number: (empty), Completed/Closed/Drop: --All--. The search results table is empty with the message 'No Record To Display'.

As shown in the image above user can proceed as follows:

1. Select Completed/Closed/Drop screen.
2. Choose Demand No.
3. Select Demand No.
4. Choose Closed from drop Down List.
5. Click on search button to generate the list of works which comes under Closed work scenario.

The screenshot shows the 'Close Work' interface with search results. The search filters are: Demand No. 07, Major Head: 4216-[07]-CAPITAL OUTLAY ON HOUSING, Minor Head: --Select--, Detail Head: --Select--, Work Number: (empty), Completed/Closed/Drop: Closed. The search results table has one record:

Sr. No.	Select	closing Date	work No.	work desc.	Remark
1	<input type="checkbox"/>		555/21	Construction of court building	

As shown in the image above user adds closing date and saves the work details.

1. Click on check box to select the work.
2. Select Closing Date as desired.
3. Add suitable remarks upon closing the work details.
4. Click on Save button to save the details.
5. Successful message gets generated after saving the details.

### Drop Work: -

In operator Login (WMS) user selects **Works Module** → **Execution** → **Close/Drop/Completion.**

Then user selects Demand No., Major Head and **Drop** from drop down list provided on the screen. On clicking Search button the list of work will get listed below who fulfils the conditions of Drop work.

The screenshot shows the 'Search Works' form with the following fields and values:

- Demand No.: 28
- Major Head: --Select--
- Minor Head: --Select--
- Detail Head: --Select--
- Work Number: (empty)
- Scheme: --Select--
- Sub Major Head: --Select--
- Sub Minor Head: --Select--
- Object Head: --Select--
- Work Description: (empty)
- Completed/Closed/Drop: Drop

The 'Select Works to Close' table is empty:

Sr. No.	Select	closing Date	work No.	work desc.
No Record To Display				

As shown in the image above user can proceed as follows:

1. Select Completed/Closed/Drop screen.
2. Choose Demand No.
3. Select Major Head.
4. Choose Drop from drop Down List.
5. Click on search button to generate the list of works which comes under Drop work scenario.

The screenshot shows the 'Search Works' form with the following fields and values:

- Demand No.: 07
- Major Head: 4216-[07]-CAPITAL OUTLAY ON HOUSING
- Minor Head: --Select--
- Detail Head: --Select--
- Work Number: (empty)
- Scheme: --Select--
- Sub Major Head: --Select--
- Sub Minor Head: --Select--
- Object Head: --Select--
- Work Description: (empty)
- Completed/Closed/Drop: Drop

The 'Select Works to Close' table now contains two rows:

Sr. No.	Select	closing Date	work No.	work desc.	Remark
1	<input checked="" type="checkbox"/>	555/19	555/19	Construction of Shopping Complex	Work Dropped
2	<input type="checkbox"/>		555/20	Construction of Water Pipe Line	

As shown in the image above user adds closing date and saves the work details.

1. Click on check box to select the work.
2. Select Closing Date as desired.
3. Add suitable remarks upon closing the work details.
4. Click on Save button to save the details.
5. Successful message gets generated after saving the details.

### Completed Work: -

In operator Login (WMS) user selects **Works Module → Execution → Close/Drop/Completion.**
